LOKOMOTIVE® is a proprietary potassium acetate formulation designed for maximum foliar uptake and minimal phytotoxicity potential. **LOKOMOTIVE** can be applied to most fields and specialty crops to correct potassium deficiency symptoms enhance growth and quality and help crops recover from stressful conditions.

Product Benefits:

- Derived entirely from potassium acetate - foliar absorption is unmatched
- Excellent translocation
- Extremely plant safe
- Excellent tank mix companion
- Non-corrosive to equipment
- Acetate is the energy molecule of all crops
- Potassium is critical for carbohydrate movement and water relations
- High analysis and absorption for lower use rates
- Increased nutrient remobilization
