The use of **STAGE™** desiccant allows the option of straight cutting and minimizes the loss of grade and yield that can occur in swathed crops. Desiccation with **STAGE**, plus **LI 700®**, promotes faster and more uniform dry down, helping to retain good color.

Product Benefits:

- Tank mix with **LI 700** non-ionic, penetrating surfactant for optimum results
- Crops dry down faster and in an upright position for an easier, quicker harvest; desiccation helps to achieve uniform dryness and good colour
- Ensure that pods dry evenly and are ready to go when you are
